While many strangers are doubtless attracted hither by the magnetism of the city's remarkable prosperity, the majority come seeking, amid its sunshine and flowers, not so much wealth, as a happy refuse from the rigors of less favored climes. To such the locating of the new home is of chief importance, and a few months may well be devoted to simply looking around before deciding just where the vine and fig tree shall be planted. Fortunate is he who is permitted in industrious lists of proffered strentions, while he listens and looks, if he is still able to justly estimate the respective attractions of the various locations presented for purchase. From many sources he soom gathers a few fixed points to aid his general judgment in reference to the character of different soils, the watter supply, dratinage, elevation, duration of fogs, direction and intensity of winds, choice different soils, the watter supply, it is such a work. It would be safe for him, if he ever passes through this lirection and intensity of winds, choice if frontage, etc. The chances are that as newcomer who most carefully resume the ear (and columns) of the trusts the attractions and advantages if different localities will have least on the safe open to his cry, if he has any to make in explanation.

"G. A. M." after giving an account of the 4d of July celebration in that thriving town—an account which is, however, hardly fresh, as a resume of the same evenus appeared in Sunday's Times—relates the following news:

On Saturday, while driving near Santa Ans. Mr. Lazenby's team "became fright oned at a band of sheep. The wagon was overturned throwing the occupants out, breaking Mr. Lazenby's arm and Mrs. Higgins's ribs.

The old echool house has been moved to the corner of Lemon and Tamarind strests, and will be fitted up for a store in the lower story, and the upper story for a hall. This is a good building, and fills a vacancy in the center of town.

There will be a musical concert given for the banefit of the M. E. Church on July 14th. Members and friends of the society will be a sasisted by Prof. Day and other eminent musicians of Los Angeles. The ladies will serve ice cream during the intermission

The unknown correspondent in Sunhay's issue refers to our section as the "Alkail Flat." and some objections are bound to the term, but we can produce omething besides alkali, and anyone vising this section will need no argument o convince them on viewing our green parden spot and comparing it with the snearal dry appearance of other sections at this time of the year; and all this is roduced wishout irrigation.
